

KITCHEN COUNTERTOPS AND BACKSPLASH PROJECTS:

WHAT TO EXPECT

- 1) We will come out to your property to provide you with a budget estimate for what your project might cost.
- 2) If you decide to go forward, the next step is for you to go to the stone/granite supplier's warehouse to select your slab.
- 3) Come to our showroom to select your backsplash and flooring (if applicable).
- 4) Go to the plumbing supply company to select your sink, faucet and any other fixtures.
- 5) Next, the fabricator will come out to your property to create the precise template from which your countertop will be made.
- 6) The stone will be moved to the fabricator's and the template will be applied to your selected slab, with careful attention being paid to the location of seams and orientation of (any) veins in the slab. We'll then have you review and approve the layout.
- 7) Our team will come out to your property to remove any existing countertops and prepare the area for the new one.
- 8) (Usually the next day) We will come out to install your new countertop. This must cure overnight.
- 9) The plumber will come out to install your sink and fixtures.
- 10) Our team will return to install your backsplash.
